## NUMBER 3. *Fibrinolysis*

*Scientific Editor:* J. L. STAFFORD

| | | PAGE |
|---|---|---|
| Introduction | *R. G. Macfarlane* | 171 |
| The development of ideas on fibrinolysis | *R. G. Macfarlane* | 173 |
| Fibrinolysis and intrinsic haemostasis | *J. L. Stafford* | 179 |
| Physiology and pharmacology of fibrinolysis | *G. R. Fearnley* | 185 |
| Fractionation and standardization of plasma fibrinolytic components | *Margaret Mackay* | 189 |
| The assessment of fibrinolytic activity in the blood | *P. T. Flute* | 195 |
| Effects of plasma lipids on fibrinolysis | *Margaret Howell* | 200 |
| Fibrinolysis and formation of biologically active polypeptides | *V. Eisen* | 205 |
| Localization of fibrinolytic activity in tissues | *A. S. Todd* | 210 |
| Fibrinolytic activity of vascular endothelium | *B. A. Warren* | 213 |
| Proteolytic activity and connective tissue | *Charles H. Lack* | 217 |
| Experimental thrombolysis with streptokinase and urokinase | *M. J. Tsapogas & P. T. Flute* | 223 |
| Thrombolytic therapy | *A. S. Douglas & G. P. McNicol* | 228 |
| ε-Aminocaproic acid and other inhibitors of fibrinolysis | *G. P. McNicol & A. S. Douglas* | 233 |
| Pathological fibrinolysis | *A. A. Sharp* | 240 |
| Glossary | | 246 |
| Notes on Contributors | | 247 |
| Book Reviews | | 249 |

# INDEX TO VOLUME TWENTY

*Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.*

A

Accidents: *Causation of bus driver accidents: an epidemiological study*, 85
Aflatoxin as carcinogen, 100
Ageing, effect on mental skills, 66
—— experimental psychology in study of, 65
—— sensory-motor performance in, 65
Agnosia, visual, 43
Alkanesulphonic esters, effects on fertility, 110
Alkylating agents, carcinogenesis by, 91, 113
—— —— effects on fertility, 107
—— —— mutagenesis by, 92
Aluminium, carcinogenic effects, 129
Amines, aromatic, carcinogenesis by, 115
—— —— tissue reactions, 118
Amino-acid inhibitors, 233
ε-Aminocaproic acid and other fibrinolysis inhibitors, 233
—— —— clinical use, 235
—— —— fibrinolytic activity in urinary tract, 237
—— —— pharmacology, 233
—— —— therapy, indications, 236
*ortho* Aminophenols as carcinogens, 117
Aminotriazole as carcinogen, 131
Amnesia, retrograde, 10
Animal behaviour, effects of drugs on, 75
*Animals for research: principles of breeding and management*, 169
—— *The A.T.A. manual of laboratory animal practice and techniques*, 170
Antiplasmins, 233
Aphasia due to brain injury, 45
Apraxia, 45
Archer, R. K.: *The eosinophil leucocytes*, 249
Arsenic, carcinogenic effects, 129
Arylhydroxylamines as carcinogens, 116
*N*-Arylhydroxylamines as carcinogens, 115
*Aspergillus flavus* as carcinogen, 127
Atheroma and fibrinolysis, 211
Attention, selective, 12
—— shifting of, 14
Auditory perception, defects, 44
AUDLEY, R. J.: Decision-making, 27
Autonomic changes due to neurological disorders, 45

B

Barbiturates, effects on human behaviour, 70
Barnett, S. A.: *A study in behaviour: principles of ethology and behavioural physiology, displayed mainly in the rat*, 83
Behaviour, animal, neurological studies, 49
—— *Determinants of infant behaviour, II*, 84
—— effects of drugs on, 70
—— —— of neurological disorders on, 43
—— *A study in behaviour: principles of ethology and behavioural physiology, displayed mainly in the rat*, 83
Benz[*a*]anthracene, metabolism of, 121, 122
BERENBAUM, M. C.: Effects of carcinogens on immune processes, 159
Beryllium, carcinogenic effects, 129
Biographical notes on contributors, 81, 165, 247
*Biological organization at the cellular and supercellular level*, 168
Bladder: *Biochemistry of bladder cancer*, 167
—— cocarcinogenesis in, 141
Blood coagulation: *The contact phase of blood coagulation*, 249
—— diseases: *Diagnosis and treatment of blood diseases*, 250
—— —— relationship to fibrinolysis, 241
—— fibrinolytic activity, assessment, 195
—— vessels, fibrinolytic activity in, 211, 213
Book reviews, 83, 167, 249
BOYLAND, E.: Polycyclic hydrocarbons, 121
—— *Biochemistry of bladder cancer*, 167
Brain injury in children, effects, 46
British Postgraduate Medical Federation: *Scientific basis of medicine: annual reviews 1963*, 250
BROADBENT, D. E.: Vigilance, 17
BROOKES, P. & LAWLEY, P. D.: Alkylatin agents, 91
BROWN, J.: Short-term memory, 8
Burkitt tumour, aetiology, 149
—— —— *The lymphoreticular tumours in Africa*, 167
Burn, H.: *Drugs, medicines and man*, 85
BURNET, M.: Immunological factors in the process of carcinogenesis, 154

# INDEX TO VOLUME TWENTY

## C

Cadmium, carcinogenic effects, 129
Cancer: *Viruses, nucleic acids, and cancer*, 168
Carcinogenesis by alkylating agents, 91
—— by deletion of repressors, 125
—— by lactones, 96
—— by nitroso compounds, 102
—— *Chemical carcinogenesis*, 167
—— immunological factors, 154
—— mechanisms of; introduction to symposium, 87
—— radiation, 134
Carcinogens, aromatic, and purines, complexes of, 124
—— —— complexes with nucleic acid, 124
—— effects on immune processes, 159
—— fungal, 127
—— metallic substances as, 127
—— natural substances as, 127
Carrageenin as carcinogen, 128
Caseum, 219
Cathepsins, 217
Cells: *Biological organization at the cellular and supercellular level*, 168
Cerebral cortex, mammalian, localization of function, 49
Children: *Pathology of tumours in children*, 168
Chondrolysis, 218
Chromium, carcinogenic effects, 129
Chromosome abnormalities due to irradiation, 136
Chylomicrons and fibrinolysis, 201
Circulation, extra-corporeal, fibrinolysis associated with, 242
Citrus oils, carcinogenic effects, 128
CLAYSON, D. B.: The aromatic amines, 115
—— *Chemical carcinogenesis*, 167
Cobalt, carcinogenic effects, 129
Cocarcinogenesis, 139
—— in skin, 140
Cocarcinogens, mode of action, 140
Cognitive changes due to sensory and perceptual deprivation, 40
Connective tissue and proteolytic activity, 217
Contributors, biographical notes on, 81, 165, 247
Cresswell, W. L. & Froggatt, P.: *The causation of bus driver accidents: an epidemiological study*, 85
CROSSMAN, E. R. F. W.: Information processes in human skill, 32
Croton oil, carcinogenic effects, 128
Cycads and cycasin, carcinogenic effects, 128
Cytokinase, 217

## D

Decision-making, 27
Defibrination, clinical syndromes associated with, 242
—— syndromes, relationship to fibrinolysis, 241
Deoxyribonucleic acid, alkylation, 91
—— —— viruses, cell-virus relationships with, 146
Deprivation, prolonged, tolerance of, 41
Diazomethane as carcinogen, 104
DICKENS, F.: Carcinogenic lactones and related substances, 96
Dimethylnitrosamine as carcinogen, 103
Doll, R., *see* Hayhoe, F. G. J., 249
DOUGLAS, A. S. & McNICOL, G. P.: Thrombolytic therapy, 228
—— *see* McNICOL, G. P., 233
Dreaming, 62
Drivers: *The causation of bus driver accidents: an epidemiological study*, 85
Drowsiness, effect on efficiency, 60
Drugs and human behaviour, 70
—— *Drugs, medicines and man*, 85
—— effects on animal behaviour, 75

## E

EACA, *see* ε-Aminocaproic acid, 233
Efficiency, biological rhythms of, 60
EISEN, V.: Fibrinolysis and formation of biologically active polypeptides, 205
Endometrium, fibrinolytic activity, 210
Endothelium, vascular, fibrinolytic activity, 213
Enzymes, fibrinolytic, species differences, 214
—— haemostatic, 181
—— thrombolytic, 229
*Eosinophil leucocytes*, 249
Ethyleneimine derivatives, effects on fertility, 109
*Euphorbia* latices, carcinogenic effects, 128
Eysenck, H. J. (editor): *Experiments with drugs: studies in the relation between personality, learning theory and drug action*, 83

## F

FEARNLEY, G. R.: Physiology and pharmacology of fibrinolysis, 185
Fibrin clot lysis, 191
—— dissolution in thrombi, role of endothelium, 215
—— insoluble, 219
—— persistence in auto-immunity, 220
—— —— in tissue, 219
Fibrinase, 219
Fibrinogenolysis, assessment, 197
Fibrinolysis activators, origin in tissue, 240
—— and formation of biologically active polypeptides, 205
—— and intrinsic haemostasis, 179
—— clinical syndromes associated with, 242
—— development of ideas on, 173
—— effects of plasma lipids on, 200
—— —— of shock and sudden death, 173, 176
—— glossary of associated terms, 246
—— induced by fractionation, 174
—— —— by solvents, 174
—— —— by tissues, 174, 175
—— inhibitors, 233
—— introduction to symposium, 171
—— measurement, 185, 241
—— mechanism, 187
—— pathological, 240
—— —— assessment, 198
—— —— therapy, 244
—— pharmacology, 187
—— physiological activator, 176
—— —— assessment, 197
—— —— function, 177
—— physiology, 185
—— relationship to blood coagulation and defibrination syndromes, 241
Fibrinolytic activity in blood, assessment, 195
—— —— localization in tissues, 210, 218
—— components, fractionation and standardization, 189
Fibrinopeptides, 180
FLUTE, P. T.: The assessment of fibrinolytic activity in the blood, 195
—— *see* TSAPOGAS, M. J., 223
Forgetting, possible causes, 8
Foss, B. M. (editor): *Determinants of infant behaviour, II*, 84
Froggatt, P., *see* Cresswell, W. L., 85
Fungal toxins and carcinogens, 127

## G

Gastrointestinal tract, cocarcinogenesis in, 141
Goitrogens, carcinogenic effects, 131
Gold, carcinogenic effects, 131
GREGORY, R. L.: Human perception, 21
Griseofulvin as carcinogen, 128
Ground-nuts as carcinogens, 127

## H

Habituation to stimulus, 14
HADDOW, A.: Mechanisms of carcinogenesis: chemical, physical and viral: introduction to symposium, 87
Haemostasis, intrinsic, and fibrinolysis, 179
Hageman Factor, 206
Hallucinatory-like experiences after perceptual deprivation, 38
Harris, R. J. C.: Aetiology of central African lymphomata, 149
—— (editor): *Biological organization at the cellular and supercellular level*, 168
Hayhoe, F. G. J., Quaglino, D. & Doll, R.: *The cytology and cytochemistry of acute leukaemias: a study of 140 cases*, 249
2-Hexenoic γ-lactone as carcinogen, 98
Hospitals: *St Thomas' Hospital*, 86
HOWELL, M.: Effects of plasma lipids on fibrinolysis, 200
Hydrazines, carcinogenic effects, 131
Hydrocarbons, polycyclic, as carcinogens, 121
—— —— metabolism of, 121
Hyperplasminaemic states, EACA therapy in, 236

## I

Imferon, carcinogenic effects, 129
Immune processes, effects of carcinogens on, 159
Immunological factors in carcinogenesis, 154
Infants: *Determinants of infant behaviour, II*, 84
Inflammation and fibrinolysis, 211
Information processes in human skill, 32
—— —— relative timing of, 36
Insecticides, carcinogenic effects, 131
Intellectual defects due to neurological disorders, 46
Iron complexes, carcinogenic effects, 129
Isolation, physiological changes due to, 40
—— sensory, effects, 38
—— tolerance of, 41
Isonicotinic acid hydrazide, carcinogenic effects, 131
Israëls, M. C. G.: *Diagnosis and treatment of blood diseases*, 250

## J

JACKSON, H.: The effects of alkylating agents on fertility, 107
Journals: *Select list of British medical periodicals: an annotated guide*, 170

## K

Kallikrein, plasma, 207
KAY, H.: Human learning, 3
Kinases, tissue, origin of, 240
Kinins, formation, 205, 206, 208
—— functional significance, 205

## L

Laboratory animals: *Animals for research: principles of breeding and management*, 169
—— —— *The A.T.A. manual of laboratory animal practice and techniques*, 170
LACK, C. H.: Proteolytic activity and connective tissue, 217
Lactones, carcinogenic, 96
LAMERTON, L. F.: Radiation carcinogenesis, 134
LANCASTER, M. C., *see* ROE, F. J. C., 127
Lane-Petter, W. (editor): *Animals for research: principles of breeding and management*, 169
Language, disorders of, due to brain injury, 45
LAWLEY, P. D., *see* BROOKES, P. D., 91
Lead, carcinogenic effects, 130
Learning, effect of ageing on, 67
—— human, theories of, 3
—— mathematical influences, 5
—— statistical theories, 5
—— verbal, 3
Leucocytes: *Eosinophil leucocytes*, 249
Leukaemia: *The cytology and cytochemistry of acute leukaemias*, 249
—— fibrinolysis associated with, 243
—— following irradiation, 134–6
Lipids, plasma, effects on fibrinolysis, 200
Lipoproteins and in-vitro fibrinolysis, 202
—— levels, effect on fibrinolysis, 200
β-Lipoprotein and fibrinolysis, 201
Liver, cocarcinogenesis in, 141
—— disorders, fibrinolysis associated with, 243

# INDEX TO VOLUME TWENTY

Lung, cocarcinogenesis in, 141
Lymphomata, central African, aetiology, 149
—— —— —— *Lymphoreticular tumours in Africa*, 167

## M

MACFARLANE, R. G.: The development of ideas on fibrinolysis, 173
—— Fibrinolysis: introduction to symposium, 171
McInnes, E. M.: *St Thomas' Hospital*, 86
MACKAY, M.: Fractionation and standardization of plasma fibrinolytic components, 189
McNICOL, G. P. & DOUGLAS, A. S.: ε-Aminocaproic acid and other inhibitors of fibrinolysis, 233
—— *see* DOUGLAS, A. S., 228
MAGEE, P. N. & SCHOENTAL, R.: Carcinogenesis by nitroso compounds, 102
Maleic anhydride as carcinogen, 98
Mason, S. E. (editor): *Signs, signals and symbols: a presentation of a British approach to speech pathology and therapy*, 84
Medicine, history: *St Thomas' Hospital*, 86
—— —— *A short history of medicine*, 2nd ed., 86
Memory defects, 45
—— disturbance, 9
—— short-term, 8
—— —— effect of ageing on, 67
—— storage in mammalian brain, 52
Menorrhagia, use of EACA in, 238
Mental skills, effect of ageing on, 66
Methanesulphonic esters, effects on fertility, 110
Methylnitrosourethane as carcinogen, 104
Morton, L. T.: *Select list of British medical periodicals: an annotated guide*, 170
Motor functions, effects of prolonged isolation on, 39
Movement, perception of, 23
Mowbray, R. M. & Rodger, T. F.: *Psychology in relation to medicine*, 83
Muscle, cocarcinogenesis in, 141
Mutagenesis by alkylating agents, 92
—— by nitroso compounds, 104

## N

Nickel, carcinogenic effects, 130
Nitrogen mustards, effects on fertility, 108
Nitroso compounds as carcinogens, 102
—— —— biochemical effects on cell, 105
—— —— mutagenesis by, 104
Nitrosamines, metabolism, 104
Noise level and sensory discrimination, 25
Nossel, H. L.: *The contact phase of blood coagulation*, 249

## O

Obstetric complications associated with fibrinolysis, 242
OSWALD, I.: The experimental study of sleep, 60
—— *Sleeping and waking: physiology and psychology*, 84

## P

Parasorbic acid as carcinogen, 99, 129
Penicillic acid as carcinogen, 98
*Penicillium islandicum* as carcinogen, 127
Peptides, plasma, 180
Perception and learning, 21
—— constancy, and distortions of visual space, 22
—— disorders, 43
—— effects of prolonged isolation in, 39
—— human, 21
—— of movement, 23
Perceptual deprivation, prolonged, effects, 38
—— identification, effect of ageing on, 66
Periodicals: *Select list of British medical periodicals: an annotated guide*, 170
Pharmacology: *Drugs, medicines and man*, 85
—— *Experiments with drugs; studies in the relation between personality, learning theory and drug action*, 83
Phenanthrene, metabolism of, 121, 122
Plant toxins and carcinogens, 128
Plasma, fibrinolytic components, fractionation and standardization, 189
—— inhibitors, 233
—— laminar flow, 182
—— lipids, effects on fibrinolysis, 200
Plasmin, fractionation and standardization, 190, 191
—— in thrombolytic therapy, 229
—— inhibitors, 233
—— relation to fibrinolytic system, 207
Plasminogen activation inhibitors, 233
—— activators, 190, 193
—— —— localization in vessel wall to endothelium, 213
—— —— release by endothelium, 214
—— and fibrinolysis, 174
—— assessment in blood, 197
—— fractionation and standardization, 189, 191
—— inhibitors, 193
Polyoma virus, cell-virus relationships, 146
Polypeptides, formation, relation to fibrinolysis, 205
β-Propiolactone as carcinogen, 96
Propyl methanesulphonates, antifertility effects, 111
Prostate, carcinoma, fibrinolysis associated with, 243
Prostatectomy, use of EACA in, 237
Protein-polysaccharide complexes, 221
Proteolytic activity and connective tissue, 217
Protoanemonin as carcinogen, 98
Psychology, experimental: introduction to symposium, 1
*Psychology in relation to medicine*, 83
Psychopharmacology: *Experiments with drugs: studies in the relation between personality, learning theory and drug action*, 83

## Q

Quaglino, D., *see* Hayhoe, F. G. J., 249

## R

Radiation carcinogenesis, 134
—— effects on fertility, 108
*Radiochemical manual. Part 2: Radioactive chemicals*, 86
Receptor processes, human, 33
Reticulo-endothelial system, cocarcinogenesis in, 141
Retinal image and perception, 22
Ribonucleic acid, alkylation, 91
Rice, mouldy, as carcinogen, 127
Rodger, T. F., *see* Mowbray, R. M., 83
ROE, F. J. C. & LANCASTER, M. C.: Natural, metallic and other substances, as carcinogens, 127
—— *see* SALAMAN, M. H., 139
Roulet, F. C. (editor): *The lymphoreticular tumours in Africa*, 167
Rous sarcoma, relationship to tumour cells, 145

## S

Safrole, carcinogenic effects, 128
*St Thomas' Hospital*, 86
SALAMAN, M. H. & ROE, F. J. C.: Cocarcinogenesis, 139
SCHOENTAL, R., *see* MAGEE, P. N., 102
*Scientific Basis of Medicine: Annual Reviews 1963*, 249
Selenium, carcinogenic effects, 131
*Senecio* alkaloids, carcinogenic effects, 128
Sensory deprivation, prolonged, effects, 38
—— discrimination, 25
SHARP, A. A.: Pathological fibrinolysis, 240
Short, D. J. & Woodnott, D. P. (editors): *The A.T.A. manual of laboratory animal practice and techniques*, 170
Silver, carcinogenic effects, 131
Simian virus 40, cell–virus relationships, 146
Singer, C. & Underwood, E. A.: *A short history of medicine*, 2nd ed., 86
Skill, information processes in, 32
Skin, cocarcinogenesis in, 140
Sleep and mental life, 62
—— deprivation, effects, 62
—— experimental study of, 60
—— fore-brain phase, 63
—— hind-brain phase, 62, 63
—— neurophysiological studies, 60
*Sleeping and waking: physiology and psychology*, 84
Snake bite, fibrinolysis associated with, 243
Somatosensory defects, 44
Speech pathology: *Signs, signals and symbols: a presentation of a British approach to speech pathology and therapy*, 84
STAFFORD, J. L.: Fibrinolysis and intrinsic haemostasis, 179
STEINBERG, H.: Drugs and animal behaviour, 75
STOKER, M.: Cell–virus relationships with tumour viruses, 145
Streptokinase and the plasmin system, 174
—— experimental thrombolysis with, 223
—— in thrombolytic therapy, 229
SUMMERFIELD, A.: Drugs and human behaviour, 70
—— Experimental psychology: introduction to symposium, 1
SUTHERLAND, N. S.: Visual discrimination in animals, 54

## T

Tannins, carcinogenic effects, 128
Thiourea, carcinogenic effects, 131
Thoracic operations, defibrination following, 242
Thrombocytopenia, fibrinolysis associated with, 243
Thrombolysis, experimental, with streptokinase and urokinase, 223
Thrombolytic therapy, 228
—— —— risks, 231
Thrombosis and fibrinolysis, 211
Tissue, fibrinolytic activity in, 210
TODD, A. S.: Localization of fibrinolytic activity in tissues, 210
Tranquillizers, effects on human behaviour, 70
Transfusion, incompatible, defibrination associated with, 243
TREISMAN, A. M.: Selective attention in man, 12
Trypsin inhibitors, 233
Tryptophan metabolites as carcinogens, 118
TSAPOGAS, M. J. & FLUTE, P. T.: Experimental thrombolysis with streptokinase and urokinase, 223
Tumour viruses, cell–virus relationships, 145
Tumours due to viruses, 141
—— homologous, transplantation in man, 156
—— *Pathology of tumours in children*, 168

## U

Underwood, E. A., *see* Singer, C., 86
Urinary tract disorders, fibrinolysis associated with, 243
Urokinase as plasminogen activator, 190
—— experimental thrombolysis with, 223
—— in thrombolytic therapy, 229

# INDEX TO VOLUME TWENTY

## V

Vigilance, 17
Viruses as cocarcinogens, 141
—— causing tumours, cell–virus relationships of, 145
*Viruses, nucleic acids, and cancer*, 168
Vision, defects, 43
Visual discrimination in animals, 54

## W

Wade, P., *see* Morton, L. T., 170
WARREN, B. A.: Fibrinolytic activity of vascular endothelium, 213
WEISKRANTZ, L.: Neurological studies and animal behaviour, 49
WELFORD, A. T.: Experimental psychology in the study of ageing, 65
Willis, R. A.: *The pathology of the tumours of children*, 168
Woodnott, D. P., *see* Short, D. J., 170
Word identification, 14

## Z

ZANGWILL, O. L.: Neurological studies and human behaviour, 43
Zinc, carcinogenic effects, 131
ZUBEK, J. P.: Effects of prolonged sensory and perceptual deprivation, 38

Printed in Great Britain by Spottiswoode, Ballantyne & Co. Ltd., London & Colchester
